## 1.0 EVALUATION SCOPE

### Compliance with the following codes:

- 2009 *International Building Code*® (IBC)
- 2009 *International Residential Code*® (IRC)
- Other Codes (see Section 8.0)

### Properties evaluated:

- Preservative-treated wood
- Decay resistance
- Termite resistance
- Corrosion
- Structural

## 2.0 USES

Osmose MicroPro®/LifeWood® and Sustain® preservative-treated wood is used in applications that are required by the code to be protected against decay and termites.

## 3.0 DESCRIPTION

### 3.1 General:

MicroPro®/LifeWood® and Sustain® preservative-treated wood products are recognized for use in aboveground, ground-contact (general use and critical structural), and freshwater-contact applications and to resist attack by fungal decay, and subterranean termites, including Formosan termites.

The preservatives to treat MicroPro®/LifeWood® and Sustain® are produced by Osmose, Inc., and are used by the wood-preserving treatment facilities listed in Table 3 of

this report to preservative-treat wood products in accordance with the Osmose, Inc., Standard MCA and Sustain® quality control documentation.

### 3.2 Preservative System:

MicroPro®/LifeWood® and Sustain® brand wood is treated with a copper and azole preservative system. The preservative includes specified ingredients of micronized copper and tebuconazole. The active micronized copper expressed as copper metal (Cu) to azole (tebuconazole) in the wood preservative is in a ratio of 25:1 with tolerances as specified in the proprietary quality control documentation.

### 3.3 Materials:

MicroPro®/LifeWood® and Sustain® preservative-treated wood materials may consist of the following:

- a. Dimensional lumber and timbers of the following species consisting of primarily sapwood: southern pine, mixed southern pine, radiata pine, Caribbean pine, red pine, Ponderosa pine, and German Scots pine.
- b. Dimensional lumber and timbers of the following species consisting primarily of heartwood: incised hem-fir.
- c. Lumber, of nominal size of 2-by-8 or less, for decking and specialty use of the species listed in (a) and (b) above.
- d. Southern pine and Douglas fir plywood.
- e. Round and sawn posts and building poles of Southern pine, ponderosa pine, red pine and incised hem-fir.

Minimum preservative retention levels must comply with the values shown in Table 1 of this evaluation report.

## 4.0 INSTALLATION

### 4.1 General:

MicroPro®/LifeWood® and Sustain® preservative-treated wood is installed as preservative-treated lumber and timbers in accordance with the requirements of the applicable code.

Osmose, Inc., and industry published installation instructions for wood and pressure-treated wood and this report must be strictly adhered to, and a copy of the instructions must be available at all times on the jobsite during installation.

The instructions within this report govern if there are any conflicts between Osmose, Inc., instructions and this report.

### 4.2 Applications:

MicroPro®/LifeWood® and Sustain® preservative-treated wood products may be used in locations where wood is permitted and/or in locations required by the code to be fungal decay or termite resistant in all building types and occupancies where permitted by the applicable code. Typical applications are described in Table 2.

Locations requiring preservative-treated wood for fungal decay or termite resistance are described in Section 2304.11 of the IBC and Sections R317, R318 and R402.1.2 of the IRC.

### 4.3 Fasteners:

Fasteners used with MicroPro®/LifeWood® and Sustain® preservative-treated wood products must be in accordance with Section 2304.9.5 of the IBC and Section R319.3 of the IRC, except that aluminum fasteners are also permitted.

#### 4.4 Structural:

**4.4.1 Duration of Load:** The maximum load duration factor allowed for MicroPro®/LifeWood® and Sustain® treated wood products used for structural members is 1.6, in accordance with Section 2.3 of the American Forest & Paper Association (AF&PA) National Design Specification for Wood Construction (NDS).

**4.4.2 Incising Factor:** When the treated wood products have been incised, the reference design values must be multiplied by the incising factor,  $C_i$ , in accordance with Section 4.3.8 of the NDS.

#### 5.0 CONDITIONS OF USE

The MicroPro®/LifeWood® and Sustain® preservative-treated wood products described in this report comply with, or are suitable alternatives to what is specified in, those codes listed in Section 1.0 of this report, subject to the following conditions:

- 5.1 Use of the preservative-treated wood is limited to the types of applications noted in Section 4.2.
- 5.2 Surface treatment of field cuts must be in accordance with the recommendations of OsMOse, Inc.
- 5.3 The MicroPro®/LifeWood® and Sustain® preservative-treated wood products are limited to the wood species noted in Section 3.3 and the minimum retention levels noted in Table 1.
- 5.4 Treatment of wood products is at the facilities of the treaters noted in Table 3, under a quality control program with inspections by Timber Products Inspection Inc. (AA-664 and AA-696) or Southern Pine Inspection Bureau, Inc. (AA-680).

#### 6.0 EVIDENCE SUBMITTED

Data in accordance with Appendix A, Copper-Azole Wood-Preservative Treatment Systems (Formerly AC143), of the ICC-ES Acceptance Criteria for Proprietary Wood Preservative Systems-Common Requirements for Treatment Process, Test Methods and Performance (AC326), dated June 2009.

#### 7.0 IDENTIFICATION

MicroPro®/LifeWood® and Sustain® preservative-treated wood products must be labeled in accordance with AC326, the name of the inspection agency (Timber Products Inspection Inc. or Southern Pine Inspection Bureau, Inc.); the product name (MicroPro®/LifeWood® and Sustain®) or logo (see Figure 1); the treatment company name and plant location (refer to Table 3); the names of the preservative components; the intended end use; minimum retention; and the evaluation report number (ESR-2240). A sample label is shown as Figure 1. For optional sample label information, refer to Section 6.8.1 of AC326.

#### 8.0 OTHER CODES

In addition to the codes referenced in Section 1.0, the products described in this report were evaluated for compliance with the requirements of the following legacy codes and earlier editions of the International Codes:

- 2006 *International Building Code*® (2006 IBC)
- 2006 *International Residential Code*® (2006 IRC)
- 2003 *International Building Code*® (2003 IBC)
- 2003 *International Residential Code*® (2003 IRC)
- 2000 *International Building Code*® (2000 IBC)
- 2000 *International Residential Code*® (2000 IRC)
- 1997 *Uniform Building Code*™ (UBC)
- BOCA® *National Building Code/1999* (BNBC)
- 1999 *Standard Building Code*® (SBC)

The MicroPro®/LifeWood® and Sustain® preservative-treated wood products described in this report comply with, or are suitable alternatives to what is specified in, the codes listed above, subject to the provisions of Sections 8.1 through 8.6.

##### 8.1 Uses:

See Section 2.0.

##### 8.2 Description:

See Section 3.0.

##### 8.3 Installation:

See Section 4.0, except for the following modifications:

Locations requiring preservative-treated wood for decay or termite resistance are described in Section 2304.11 of the 2000, 2003 and 2006 IBC, Sections R323 and R324 of the 2000 IRC, Sections R319 and R320 of the 2003 and 2006 IRC, Section 2304 of the SBC, Section 2311 of the BNBC, and Section 2306 of the UBC.

Fasteners used with MicroPro®/LifeWood® and Sustain® preservative-treated wood products must be in accordance with Section 2304.9.5 of the 2000, 2003 and 2006 IBC, Section R323.3 of the 2000 IRC, Section R319.3 of the 2003 and 2006 IRC, Section 2306.3 of the SBC, Section 2311.3.3 of the BNBC, and Section 2304.3 of the UBC, except that aluminum fasteners are also permitted.

##### 8.4 Conditions of Use:

See Section 5.0.

##### 8.5 Evidence Submitted:

See Section 6.0.

##### 8.6 Identification:

See Section 7.0.

**TABLE 1—MINIMUM PRESERVATIVE RETENTION REQUIREMENTS FOR OSMOSE MICROPRO®/LIFEWOOD® AND SUSTAIN® WOOD PRODUCTS BY END USE**

END USE	MINIMUM TOTAL RETENTION <sup>1, 2</sup> , pcf (kg/m <sup>3</sup> )
Above ground	0.06 (1.0)
Ground contact—General Use	0.15 (2.4)
Ground contact—Critical Structural	0.23 (3.7)

<sup>1</sup>Retention is expressed in pounds of preservative per cubic foot (kilograms per cubic meter) of preservative actives.

<sup>2</sup>Minimum active component retentions of Cu and azole are noted in the Osmose, Inc., Standard MCA and Sustain® quality control documentation.

**TABLE 2—TYPICAL APPLICATIONS FOR OSMOSE MICROPRO®/LIFEWOOD® AND SUSTAIN® WOOD PRODUCTS**

SERVICE CONDITIONS	AWPA USE CATEGORY	TYPICAL APPLICATIONS
Interior construction, above ground, dry	UC1	Interior construction - millwork and furnishings
Interior construction, above ground, damp	UC2	Interior construction - interior beams, timbers, flooring millwork and sill plates
Exterior construction, above ground, coated and rapid water runoff	UC3A	Exterior - coated millwork, siding and trim
Exterior construction, above ground, uncoated and poor water runoff	UC3B	Decking, guardrails, spindles, flooring, deck joists, beams and framing, deck posts above grade support on concrete piers with a steel bracket, trim and fascia, sill plates, fence rails, trellises, gazebos
Ground contact - general use	UC4A	Deck support posts, fence posts, retaining walls
Ground contact - critical structural	UC4B	Permanent wood foundations, sawn and round building poles
